Projects

1. **FlyDubai Website**
   link: https://www.flydubai.com/en/

   Developed Flydubai Website Using React js and Next js Framework. City to City, Country to Country, Popular destination panels are made by our team.

   - Banner, Search Widgets, Popular getaways, Explore our destination network are majorly done.
   - All of the pages are made by Dynamic Components fetching data through the database.
   - This website is both mobile and desktop friendly to give the best experience to the user.

   Technologies used: ReactJS, NextJS, NodeJS, CSS.

2. **Dhanguard Website**
   link: https://dhanguard.terbiumsolutions.in/lets-work

   Developed dhanguard website both desktop and mobile friendly using php laravel framework. Html, Css, Bootstrap and Javascript are used for the frontend purpose and php is used for backend.

   - A header is developed for the routing purpose and there are several links so that users can go through several pages.
   - The Home, Plans And For venues section is used to give the information to the user.
   - And Explore and Resources have several heading so that users can go through different sections.
   - This website is both mobile and desktop friendly to give the best experience to the user.

   Technologies used: HTML, CSS, Bootstrap, JS, PHP – Laravel Framework

3. **RainbowTex Website**
   Link: https://rainbowtex.me/en

   Developed a responsive Header Section Using PHP Bootstrap and JS

   - Developed the header part and implemented several links, likely a mega-menu on hover on desktop mode and dropdown on Mobile mode.
   - To make the header responsive , I've used Bootstrap.

   Technologies used: HTML, CSS, Bootstrap, JS, PHP – Laravel Framework

4. **NXT Trendz App Clone**
   Link: https://nxttrendzappsp.ccbp.tech

   Developed a responsive website for Food Store where users can see a list of food items, detailed information about a food item, offers

   - Implemented Nxt Trendz application which is a clone for ECommerce applications like Amazon, Flipkart where users can login and can see list of products with search, filters, sort by, etc..
   - Implemented Different pages and routes for Login, Products, Product details using React Router components Route, Switch, Link, props, state, lists, event handlers, form inputs.
   - Authenticating and authorizing users by taking username, password and doing login POST HTTP API Call and implementing filters by sending them as query parameters to product api calls.
   - Persisted user login state by keeping jwt token in local storage, Sending it in headers of further api calls to authorize the user.
   - For login purpose use: username: rahul, password: rahul@2021

   Technologies used: React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication
